PROFESSIONAL SUMMARY

Business and analytics professional with strong communication and stakeholder skills. Skilled at simplifying complex data and supporting fast-paced, client-focused, data-driven decisions.

EXPERIENCE

Software Engineer | InCom

February 2025 – Present

- Built interactive Power BI and Tableau dashboards visualizing KPIs, operational metrics, and financial trends for leadership decisions.
- Designed and optimized ETL workflows with validation and reconciliation checks, ensuring high data accuracy and reliability across systems.
- Optimized SQL and Python processes, reducing data processing time by 25% and integrated API-based feeds to speed reporting and cut manual effort.
- Partnered with stakeholders to gather requirements, communicate insights clearly, and deliver actionable reports.

Data Analyst | Advanced Knowledge Tech

October 2023 – January 2025

- Translated stakeholder requirements into BRDs, workflows, and user stories for technical implementation.
- Built Power BI dashboards tracking KPIs and vendor performance, reducing issue detection time by 30%.
- Ran SQL/Excel trend and cost analysis that surfaced inefficiencies, supporting 10% cost-reduction initiatives.
- Automated data validation, audit checks, and ETL with Python, SQL, and API integrations, reducing manual reporting by 40%.

Junior Data Analyst | DXC Technology

January 2020 – May 2022

- Extracted, cleaned, and reported on high-volume operational and vendor data (~100K records/day) using SQL, Python, and Excel.
- Built Power BI/Tableau dashboards and validated ETL pipelines for accurate, consistent, reporting-ready data.
- Performed trend, variance, and cost analysis and partnered with finance/operations to improve reporting processes.

EDUCATION

M.S., Business Analytics & Artificial Intelligence — The University of Texas at Dallas

B.Tech, Computer Science & Engineering — Jawaharlal Nehru Technological University, Hyderabad

SKILLS

- | | |
|---|--|
| • Business Operations & Support | : KPI reporting, financial analysis, forecasting, process improvement, stakeholder collaboration, product-focused analytics. |
| • Analytics & Reporting | : Power BI, Tableau, KPI Dashboards, Excel, Google Analytics |
| • Programming & Scripting | : Python, SQL, PySpark, Java, ETL Automation |
| • Data Platforms & Cloud | : Google Cloud Platform (BigQuery), Microsoft Azure (data services exposure), AWS (S3, Athena), Snowflake, Databricks |
| • Databases | : SQL Server, PostgreSQL, MongoDB, Oracle |
| • ETL & Data Integration | : ETL Pipelines, Data Transformation, dbt, API/XML Integration |
| • Data Modeling & Architecture | : Star/Snowflake Schema, Data Validation, Data Quality, Reconciliation |
| • Workflow & Orchestration | : Apache Airflow, Job Scheduling, Pipeline Monitoring, Automated Workflows |
| • Infrastructure, DevOps & Systems | : Terraform (IaC), CI/CD pipelines, deployment automation, Git, BRDs, user stories, SAP, CRM systems, PowerApps |
| • Platforms & Utilities | : SSMS, JIRA, Git, Postman, ServiceNow, Wireshark, SolarWinds, Nagios |
| • Soft Skills | : Communication, teamwork, attention to detail, problem-solving, resilience |
-

ACADEMIC PROJECTS

- **UTD Chatbot (UT Dallas)** UTD-focused chatbot using LangChain, OpenAI API, and web scraping; deployed LLaMA-2-7B-Chat with prompt engineering for reliable responses.
- **Stock Market Prediction on News Sentiments (BRECW)** deep-learning and time-series model exploring data-driven investment strategies.
- **Automated Food Ordering System (BRECW)** web-based order-processing system that reduced wait times and long queues.

ENTREPRENEURSHIP, LEADERSHIP & VOLUNTEER

- **Founder, myclicks_c Photography** (2019 – Present) — grew to 100+ clients; run marketing, client engagement, and end-to-end delivery.
- President — Photography Club (2018–20) & Sports Club (2019–21), BRECW; Photography Officer — Code EXE, UT Dallas (2022–23).
- Captain, Under-19 Women's Cricket Team, Hyderabad Cricket Association of India; Volunteer, Amma Foundation.
